DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to an ozonizer, classified in class 422, subclass 186.07.
 - II. Claims 6-10, drawn to a bag, classified in class 426, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not rely upon the specific details of the subcombination for patentability. The subcombination has separate utility such as a container with attached conductive grids.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR

Art Unit: 1753

1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Attorney Leonard Tachner on 14 September 2007 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-5. Affirmation of this election must be made by applicant in replying to this Office action. Claims 6-10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Examiner's Amendment

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

Art Unit: 1753

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Leonard Tachner on 18 September 2007.

The application has been amended as follows:

In the Specification:

Page 8, line 7, insert --6,713,027 B2-- after "U.S. Patent No.".

In the claims:

Claim 1, line 5, insert --high voltage-- before "transformer for supplying"; and

line 7, insert --transformer-- after "connected to said high voltage".

Cancel non-elected claims 6-10 to the filing of a divisional application.

6. The following is an examiner's statement of reasons for allowance: Because the prior art references do not disclose in an ozonizer apparatus for sterilizing items the provision of the recited bag in combinations with other recited structures as claimed in claims 1-5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
